terrasym[®] 450 for CORN + DUST[™]

PLANTER BOX APPLICATION

Terrasym[®] 450+DUST[™] for Corn from NewLeaf Symbiotics[®] in partnership with Low Mu Tech[™] is recommended for dry planter box application at a label rate of 0.5 oz (3.5 g) per unit of corn (80,000 seeds/unit), and can be applied in all planter types. When used as directed, each 1.56 lb (0.7 kg) pouch of Terrasym 450+DUST for Corn covers 50 units of seed corn. All Terrasym products contain living microbes called pink pigmented facultative methylotrophs, or PPFMs, and should be treated as “live.”

These instructions are designed for use with the scoop included with the Terrasym 450+DUST packaging.

PLANTER BOX DIRECTIONS FOR USE

INDIVIDUAL/SINGLE ROW UNITS APPLICATION

1. Remove the provided 1 oz (80 cc) scoop from the packaging.
2. Using the provided scoop and application rates listed in the graphic below, sprinkle Terrasym 450+DUST for Corn into the individual/single row unit and stir gently for uniform seed coverage.

*Provided scoops reference volume measurements versus the weight measurements used in Terrasym product application. This Terrasym product should be applied using the amount indicated in the graphic only. Do not use provided scoop for any calculations.

(80cc - 1 oz) Scoop

Apply quantity one (1) level scoop of product for every two (2) units of seed

BULK APPLICATION (50 UNITS OF CORN SEED)

Open one 1.56 lb (0.7 kg) pouch of Terrasym 450+DUST for Corn and gently mix product into 50 units of corn seed, alternating between pouring corn seed and product for uniform seed coverage.

DISPOSAL

Dispose of any remaining product and packaging in accordance with local/regional national/international regulations.
